Identity, Credential, and Access Management (ICAM)

Information Security and Privacy

Cloud Services

Automation

IT Modernization

Data & Analytics

Core Competencies

- Identity, Credential, and Access Management (ICAM)
- Cloud Services and Digital Transformation
- Information Security and Privacy

- System Integration and API Management
- AI Driven Automation
- Data and Analytics

Identity, Credential, and Access Management (ICAM)

greenthreads is an industry leader in delivering enterprise vendor agnostic ICAM solutions that align with Zero Trust principles and federal mandates. We support over 80 million identities and 1,000+ applications for the Department of Veterans Affairs and have modernized ICAM architecture for USPTO and DoD.

Key Capabilities:

- Multi-vendor ICAM integration (Okta, SailPoint, Entra ID, Saviynt, CyberArk, CA PAM...)
- Non-phishable MFA (PIV, FIDO2, Mobile Push)
- RBAC to ABAC transitions, XACML policy frameworks
- Legacy modernization through ICAM-IDaaS and API security
- Blockchain and self-sovereign identity exploration

Cloud Services and Digital Transformation

greenthreads has architected, migrated, and optimized large-scale, multi-cloud environments across Azure, and AWS, enabling secure and scalable transformation with minimal operational disruption.

Cloud Solutions Include:

- Multi-region, high-availability architecture
- Enterprise cloud migrations (1000+ VMs and 10+ services, 1000+ Integrations)
- Human Center Design and usability analysis for diverse user community
- SaaS, PaaS, IaaS, and hybrid deployment strategies
- Analysis of Alternatives based on organizational goals, budget, and risk tolerance

Information Security and Privacy

We deliver secure, compliance-ready architecture from the foundation and operational frameworks for cybersecurity resilience and continuous monitoring.

Security Services:

- Risk Management Framework (RMF) policy creation
- Continuous ATO environments and scorecard dashboards through automation and AI adoption
- FedRAMP and ATO Compliance
- GRC tools (ServiceNow, eMASS, CSAM) expertise
- Trusted Platform Module (TPM) and API security enforcement
- Security and compliance automation for FedRAMP and ATO
- Continuous Monitoring (ConMon) and cloud-native optimization

System Integration and API Management

We help clients unlock interoperability across hybrid IT environments by modernizing legacy systems, building scalable integration patterns, and securing APIs.

Integration Capabilities:

- Migration from monolithic to microservice/API-driven models
- Interface abstraction and standards-based adapters
- REST/JSON/XML transformations and orchestration
- Secure onboarding and capacity-aware SLA frameworks
